Phone: 0919222322
Email: minhtam1792005@gmail.com
Address: Binh Thanh, Ho Chi Minh City

SUMMARY

Fullstack Developer with experience in Java, JavaScript, and TypeScript, building responsive web applications with React, Next.js, Tailwind CSS, and developing backend services with Spring Boot and Node.js Express. Skilled in user-facing features, RESTful API integration, database-driven features, and performance optimization.

EDUCATION

VNUHCM - University of Information Technology Sep 2023 - June 2027 expected
Information Technology - GPA: 8.18 / 10

WORK EXPERIENCE

HONEYNET Joint Stock Company | Backend Developer Intern June 2025 - June 2026
Project: Social Welfare Application - Published on App Store: apps.apple.com/vn/app/id6761987939
Tech Stack: Node.js (Express.js), TypeScript, PostgreSQL

- Built backend APIs for **authentication and account management**, improving the reliability of user onboarding and account recovery across registration, OTP verification, login, password setup, and password reset flows.
- Designed **PostgreSQL data models and backend logic** to support core social welfare features, enabling structured management of news/events, donation activities, activity search, and comment approval workflows.
- Developed **real-time notification APIs** with robust request validation for successful application submissions.

PROJECT

DeepReader - AI-Powered Reading Platform | **Fullstack Developer**
Team Project - 6 members | Github: github.com/23520904/deepreader
Tech Stack: Spring Boot, Next.js, Tailwind CSS, PostgreSQL, MongoDB, Redis, Qdrant, Docker, Prometheus, Grafana

- Improved **SEO and page performance** across Next.js/Tailwind pages, achieving **90+ Lighthouse** scores on both mobile and desktop and reaching top 5 Google Search results for selected target keywords.
- Built a **RAG-powered PDF/EPUB learning flow** using Gemini embeddings and Qdrant/Haystack, supporting uploads up to **25MB**, grounded Q&A with citations, summaries, and **1-50 flashcards**.
- Designed an async ingestion pipeline that splits documents into **1,500-character chunks** with **200-character overlap**, creates **768-dimensional embeddings** in **50-chunk batches**, and indexes them for vector search.
- Implemented **Redis-backed rate limiting** to prevent API abuse and protect AI inference endpoints, enforcing quotas of **120 general API requests/min**, **60 AI image-recognition requests/min/user**, and stricter limits for authentication flows.

Blockchain-Integrated E-commerce Platform | **Fullstack Developer**
Team Project - 5 members | Github: github.com/TamNgx179/blockchain-vehicle-marketplace
Tech Stack: React, Vite, CSS, JavaScript, Node.js (Express.js), Solidity, Ethers.js, Hardhat, MongoDB

- Achieved **90+ Lighthouse/PageSpeed** performance scores on both mobile and desktop for a React/Vite vehicle marketplace, optimizing listing, search/filter, car detail, cart/checkout, wallet, orders, and admin pages.
- Built RESTful Express APIs covering **JWT/OTP authentication**, cart, checkout, order history, and admin order management, enabling a complete **4-step checkout** from cart selection to transaction confirmation.
- Integrated **Sepolia escrow smart contracts** with Express services and MongoDB, synchronizing deposit, full-payment, seller confirmation, completion, and cancellation states to ensure reliable order records.

SKILLS

Programming Languages: Java, JavaScript, TypeScript, HTML, CSS
Frameworks & Libraries: Spring Boot, Express.js, React, Next.js, Tailwind CSS
Databases & Cache: PostgreSQL, MongoDB, SQL Server, Redis
DevOps & Monitoring: Docker, Prometheus, Grafana
Tools: Git, GitHub, Postman, Figma
Soft Skills: Problem Solving, Communication, Teamwork, Requirements Analysis

CERTIFICATES

IDP - IELTS 6.5 OVERALL May 2023
Google - Google AI Essentials Sep 2024
